

Hidden Villa Environmental Education Science and Nature Videos Supporting Materials

105 – Who Lives Under Logs?

Description: This video shows examples of the small animals that live under logs.

Can be used for NEXT GENERATION SCIENCE STANDARD K-ESS3-1

K-ESS3-1 Earth and Human Activity

Students who demonstrate understanding can: Use a model to represent the relationship between the needs of different plants and animals (including humans) and the places they live.

<p>Science and Engineering Practices Developing and Using Models Analyzing Modeling in K-2 builds on prior experiences and progresses to include using and developing models (i.e. diagram, drawing, physical replica, diorama, dramatization, storyboard) that represent concrete events or design solutions. Use a model to represent relationships in the natural world.</p>	<p>Disciplinary Core Ideas ESS3.A: Natural Resources Living things need water, air, and resources from the land, and they live in places that have the things they need. Humans use natural resources for everything they do.</p>	<p>Crosscutting Concepts Systems and System Models Systems in the natural and designed world have parts that work together.</p>

Question on video:

Where are some special places that animals live?

Supplemental questions:

- Can you touch every animal you find under a log? (No)
- Why do these animals live under logs?
- What is another word for a "special place for animals to live"? (Habitat)
- Define what makes a habitat. (Food, shelter, water)
- Name a habitat and an animal that lives there.
