124 – Life on the Prowl: Adaptations of a Fox

Description: This video shows the adaptations of a fox. Can be used for NEXT GENERATION SCIENCE STANDARD 4-LS1-1

4-LS1-1 From Molecules to Organisms: Structures and Processes

Students who demonstrate understanding can: Construct an argument that plants and animals have internal and external structures that function to support survival, growth, behavior, and reproduction.

<p>Science and Engineering Practices Engaging in Argument from Evidence Engaging in argument from evidence in 3-5 builds on K-2 experiences and progresses to critiquing the scientific explanations or solutions proposed by peers by citing relevant evidence about the natural and designed world(s). Construct and argument with evidence, data, and/or a model.</p>	<p>Disciplinary Core Ideas LS1.A: Structure and Function Plants and animals have both internal and external structures that serve various functions in growth, survival, behavior, and reproduction.</p>	<p>Crosscutting Concepts Systems and System Models A system can be described in terms of its components and their interactions.</p>
--	--	---

Supplemental questions:

- What are the fox adaptations discussed in the video? How do these adaptations help this animal survive?
- What adaptations does a dog have and why?
- Describe a food chain that includes the fox.
- Make a list of predators and their prey.
